

Jean-Pierre CHANGEUX et al.  
Serial No. 09/349,925

Attorney Docket No. 3495.0135-02

APPENDIX

RECEIVED  
AUG 31 2001  
TECH CENTER 1600/2900

IN THE SPECIFICATION:

Page 3, the paragraph beginning at line 11:

The inventors' knowledge of the biology of acetylcholine receptors provided an important foundation for this invention (see Changeux, The New Biologist, vol. 3, no. 5, pp. 413-429, May 1991). Different types of acetylcholine receptors are found in different tissues and respond to different agonists. One type, the nicotinic acetylcholine receptor (nAChR), responds to nicotine. A subgroup of that type is found only in neurons and is called the neuronal nAChR.
